

TUNKU ABDUL RAHMAN UNIVERSITY OF MANAGEMENT AND TECHNOLOGY ACADEMIC	EFFECTIVE DATE:	16-MAY-2023
	REVISION DATE:	-
GUIDELINES	REF. NO.:	PO/104:23(R0)
	TOTAL PAGE:	4

General Guidelines for Use of Generative Artificial Intelligent (AI) tools in Teaching, Learning and Assessment (TLA)

1. Lecturers are to remain positive about generative AI tools and their educational potential.
2. Do **NOT** limit any students' access to generative AI tools or any form of technology that could be beneficial to their learning experience.
3. Generative AI tools may be used to generate preliminary ideas, refining writing skills and enhance comprehension or writing techniques of any subject matter within the context of the given academic tasks.
4. Lecturers shall educate and support students to use the generative AI tools **ethically** and **responsibly**.
5. Coursework assessments that allow excessive use of Generative AI tools shall be **avoided**.
6. Lecturers shall intensify efforts by focusing more on experiential learning and encourage students to demonstrate their learning by means of interpreting, live demonstration, analysing, peer discussions, synthesising the relevant information and other interactive methods which develop students' critical thinking and problem-solving skills.
7. Lecturers shall redesign the assessment criteria that required more oral assessment, critical thinking and problem-solving skills, open-ended questions, real case study or set milestones for the research project and provide feedback for each milestone to understand students' progress and prevent them from using Generative AI excessively.
8. All staff and students shall strive to uphold the **academic integrity** and adhere strictly to the University's plagiarism policy which is made available on the intranet.
9. The university takes plagiarism and other breaches of academic integrity including violation of intellectual property and copyright laws, deceptive fabrication and all other forms of cheating seriously.

10. All academic works submitted for assessment purposes must be **original** and students must not submit any academic work that merely presents ideas or arguments solely derived from any generative AI tools or other sources without proper acknowledgment.
11. Students are required to acknowledge the originality of their works and use of generative AI tools by signing a plagiarism statement form as attached.
12. Any suspected plagiarism and use of generative AI tools without acknowledgement during the grading of assessments will be treated as an **academic misconduct** and is subject to disciplinary action by the University.

GENERAL GUIDELINES FOR THE USE OF GENERATIVE ARTIFICIAL INTELLIGENT (AI) TOOLS IN TEACHING, LEARNING, AND ASSESSMENT (TLA)

WHAT IS GENERATIVE ARTIFICIAL INTELLIGENT (AI) TOOLS

Generative artificial intelligence (AI) describes algorithms (such as ChatGPT) that can be used to create new content, including audio, code, images, text, simulations, and videos.

HOW IT WORKS

Generative AI tools may be used to generate preliminary ideas, refine writing skills and enhance comprehension or writing techniques of any subject matter within the context of the given academic tasks.

BE POSITIVE

- Lecturers are to remain positive about generative AI tools and their educational potential.
- Do NOT limit any students' access to generative AI tools or any form of technology that could be beneficial to their learning experience.
- Lecturers shall educate and support students to use the generative AI tools ethically and responsibly.

BE CREATIVE

- Lecturers shall intensify efforts by focusing more on experiential learning and encourage students to demonstrate their learning by means of interpreting, live demonstration, analysing, peer discussions, synthesising the relevant information and other interactive methods which develop students' critical thinking and problem-solving skills.
- Lecturers shall redesign the assessment criteria that required more oral assessment, critical thinking and problem-solving skills, open-ended questions, real case study or set milestones for the research project and provide feedback for each milestone to understand students' progress and prevent them from using Generative AI excessively.

BE RESPONSIBLE

- Coursework assessments that allow excessive use of Generative AI tools shall be avoided.
- All staff and students shall strive to uphold academic integrity and adhere strictly to the University's plagiarism policy which is made available on the intranet.
- The university takes plagiarism and other breaches of academic integrity including violation of intellectual property and copyright laws, deceptive fabrication and all other forms of cheating seriously.
- All academic works submitted for assessment purposes must be original and students must not submit any academic work that merely presents ideas or arguments solely derived from any generative AI tools or other sources without proper acknowledgement.
- Any suspected plagiarism and use of generative AI tools without acknowledgement during the grading of assessments will be treated as academic misconduct and is subject to disciplinary action by the University.
- Students are required to acknowledge the originality of their works and use of generative AI tools by signing a plagiarism statement form.
